# Use function on data

```

```

0	1
1	2
2	3
4	4
5	5

```

0	1
1	4
2	9
4	16
5	25

```
def square_function(x):  
    return x**2

```
result = data.apply(lambda x : x**2 )
